PROFILE

A BTech student in Artificial Intelligence & Machine Learning at Vijaybhoomi University, with a minor in Sound Engineering from True School of Music, Vijaybhoomi University. Strong interest in robotics, drones, embedded systems, and data-driven technologies. Experienced in academic projects involving Arduino, sensors, and automation, with hands-on exposure to problem-solving and system design. Possess strong analytical, teamwork, and learning skills. Keen to build a career in AI, robotics, and intelligent systems.

EDUCATION

Vijaybhoomi University | Karjat, India

Sep 2024 – Mar 2028

BTech Artificial Intelligence & Machine Learning

Shardashram Vidyamandir | Dadar, India

Jun 2022 – Mar 2024

Higher Secondary (12th)

Subjects: Physics, Chemistry, Maths, Mechanical Maintenance

EXPERIENCE

AiGENThix | Bangalore, India

Intern – Mechatronics & IoT

Aug 2025 – Present

- Working on the design and development of AI receptionist robots, focusing on mechanical structure and component layout. Involved in product architecture, prototyping, and system integration. Market research and requirement analysis to support feature planning.
- Writing and modifying C programs for hardware control and embedded system functionality.

DBM India (NIT) | Govandi, India

May 2025 – Jun 2025

Student Volunteer

- Developed education and teacher guidelines for underprivileged children in low-literacy communities.
- Conducted field research and community outreach across multiple slum areas, collecting 60+ student profiles daily.
- Contributed to volunteer recruitment strategy and presented proposals to leadership for implementation.

PROJECTS

Multi-Mode Arduino Robot (LFR & Obstacle AVOIDER) | 2025

- Built a robot using Arduino with line-following, obstacle avoidance.
- Integrated sensors, motor driver and Bluetooth module for real-time navigation and control.

Bluetooth Signal Interference (Educational Project) | 2026

- Developed an experimental setup to study Bluetooth signal behaviour and interference patterns.
- Gained hands-on understanding of wireless communication and signal disruption mechanisms.

ACHIEVEMENTS

Certifications

- | | |
|---|-----------------|
| • Tata – GenAI Powered Data Analytics Job Simulation, Forage
<i>GenAI, Data Analysis, Business Insights</i> | Jan 2026 |
| • AWS – Solutions Architecture Job Simulation, Forage
<i>Cloud Architecture, Cost Management</i> | Nov 2025 |
| • Tata – Data Visualisation Job Simulation, Forage
<i>Data Cleaning, Visualization, Presentation</i> | Nov 2025 |

SKILLS

Languages: Marathi (Native), English (Conversational), Hindi (Conversational)

Programming Languages: Python, C, SQL

Core: DSA, Discrete Mathematics, Linear Algebra, Probability & Statistics, Statistical Modelling

AI & Data: Data Analysis, Data Visualization, GenAI

Hardware: Arduino, Sensors, Embedded Systems

Tools: GitHub, Arduino IDE, MS Word, Excel, PowerPoint

HOBBIES & INTERESTS

Running & Athletics: Completed IIT Bombay Half Marathon (Nov 2025); actively participate in track events.

Photography: Head of Photography & Videography Production for **MARCOM Committee** and **VUTV**, responsible for college event coverage and Podcasts.

Robotics: Build and experiment with Arduino-based robots, sensors, and automation systems, including obstacle-avoiding.

Sports: Cricket, Volleyball, Carrom, GYM, Athlete, Swimmer
